## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-33, 38 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiota et al. in view of applicants' admitted prior art (page 2, lines 11-15 and page 13, lines 14-22).

Shiota et al. disclose a photo finishing lab including a plurality of image obtaining devices (scanner 4 and digital camera via a cable interface 5 or a card reader 6), a plurality of output devices (printer, MO disc drive and ZIP drive), associating each image with ID data (col. 4, lines 30-31 and 49-58), creating batches from multiple orders in the buffers (col.5, lines 18-29), providing a product from the output devices and combining the image product with related output (col. 5, line 26). Shiota et al. do not teach analyzing images and comparing the analyzed images with reference image data representative of an optimum image. However, as noted in applicants' admitted prior art, such a process using a computerized system is notoriously well known in the art. Accordingly, to provide the system of Shiota et al. with a processor that analyzes the images and compares the analyzed images with reference image data representative of an optimum image, as taught by the admitted prior art, would have been obvious for one having ordinary skill in the art at the time of the invention. The motivation for such a change would have been an improved photoproduct for the customer as well as a more efficient photo processing system.

With respect to claims 7 and 20, to provide magnetic data on the film would have been obvious for the skilled artisan, since such a feature is a well-known expedient in the digital photo processing art.
